Rediscover
an Essential

A Standard with High Standards

The Mobilia Columns and Bollards are already gracing a number of sites and areas with their streamlined and contemporary design. Mobilia fixtures are life-centric, customizable lighting tools for every site and area. Their round and square forms integrate effortlessly with surrounding architecture, public squares, walkways, pedestrian and bicycle paths, and landscape designs. Essential standards of any outdoor lighting design, Mobilia upholds Lumenpulse's highest standards and those who design with it.

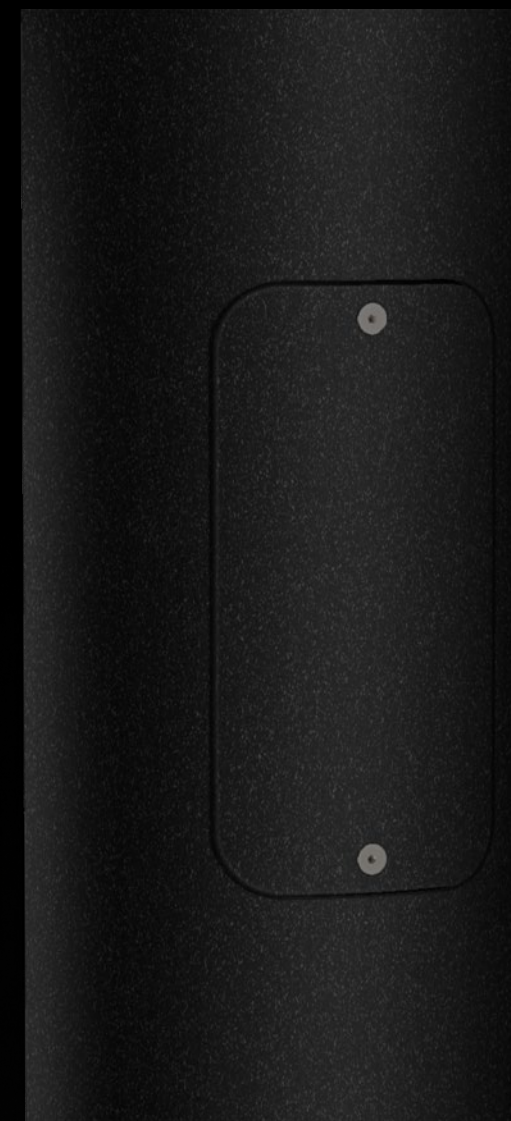

Mobilia Family Portrait

Out of Sight

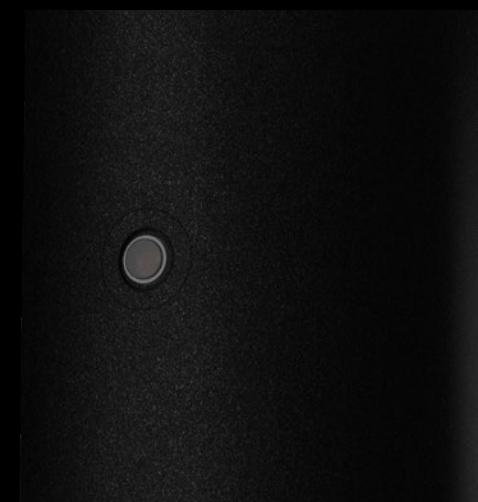

Is out of mind. There's nothing to see here but pristine light and a heightened aesthetic. Mobilia luminaires are easy on the eyes because of their non-visible hardware: their tamper-resistant hardware and precision-machined, discreet flush door, motion detector, and photocell. Mobilia's non-visible technical features help them blend with every architectural angle, every pedestrian path, and every imagination.

A Fluid Fit

Flexibility is the key to Mobilia's multi-project integration. An array of sizes, shapes, luminous fluxes, color temperatures, distributions, finishes, and lenses enhance the surroundings while creating a unique lighting experience for the lives lived around them.
