# SITE AND ENVIRONMENT

VOLUME 1

*Light makes  
the eye feel.*

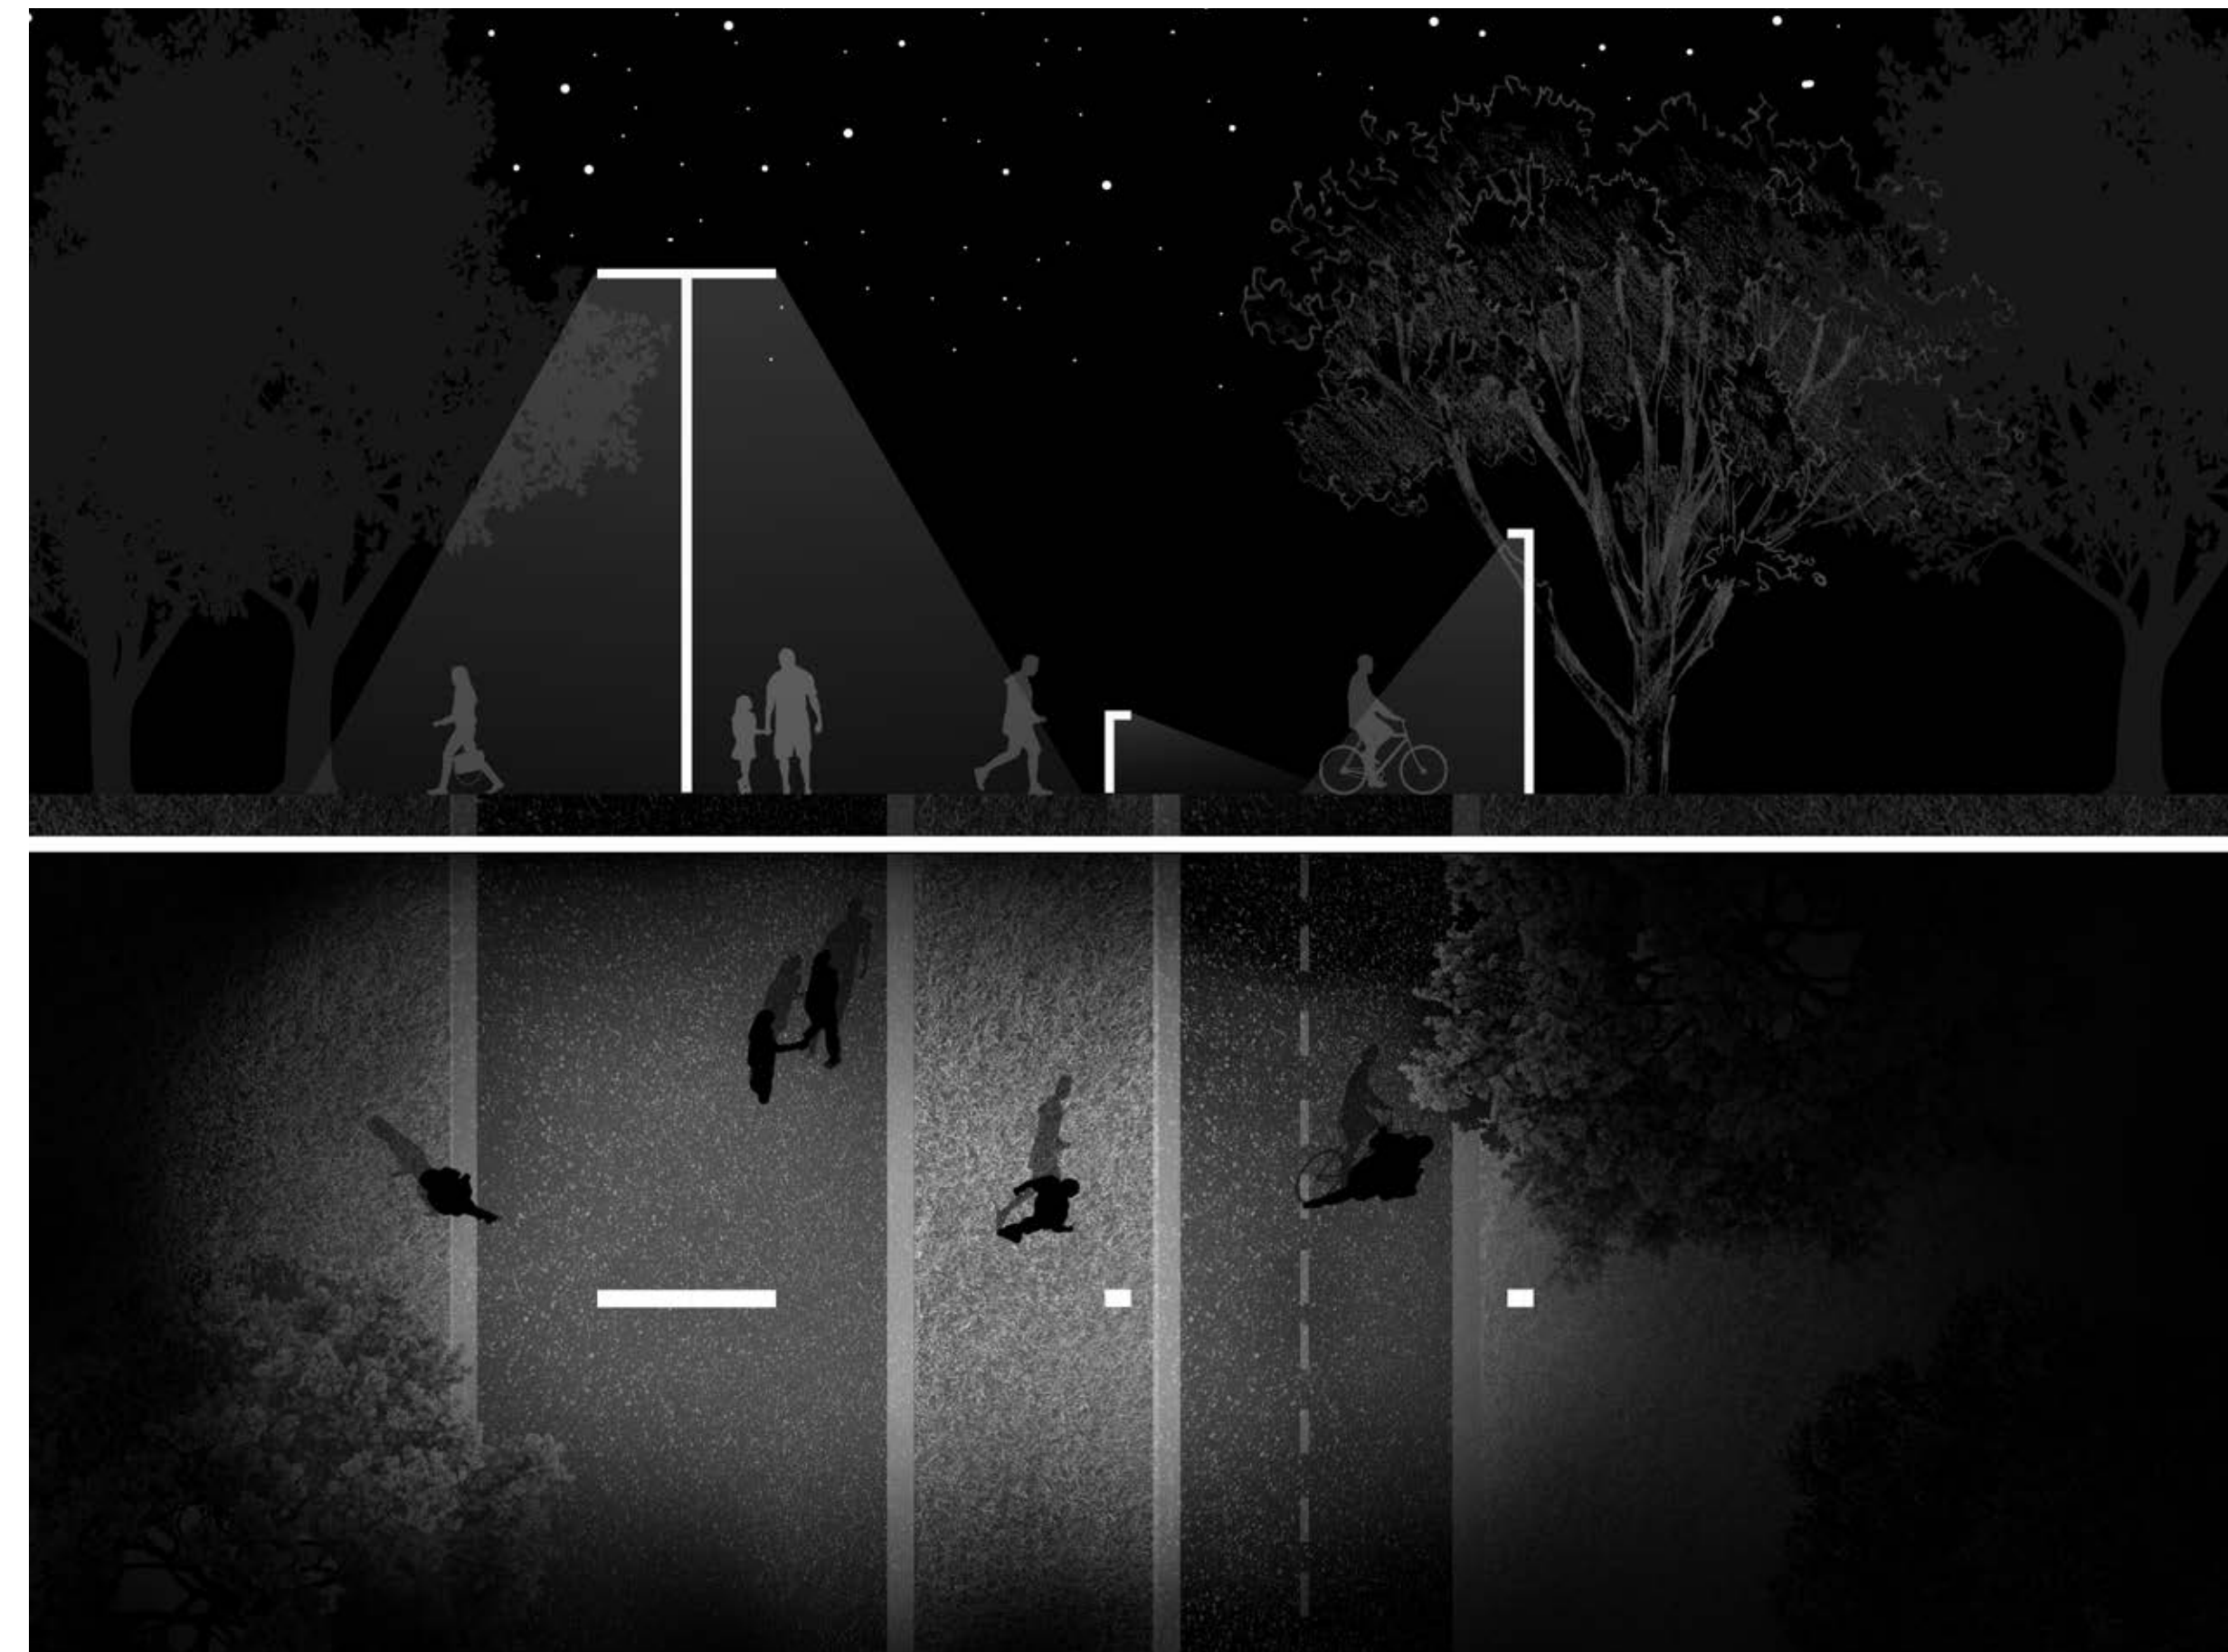

WE MAKE LIGHT THAT  
OPENS UP LANDSCAPES.

LIGHT THAT USHERS YOU INTO  
THE WORLD AROUND YOU.

LIGHT THAT FORMS AND  
TRANSFORMS OUR EXPERIENCE.

Our urban dependence has distanced most of us from the natural world. In many cases, outdoor sites and environments are too often just the spaces between “A” and “B,” or seen as places of leisure that we visit when we can. They are often an afterthought or just an aesthetic addition to please the eye. But when they are properly planned, they are so much more. We know the regenerative nature of nature and how it is an integral part of our humanity. We need regular visits and interactions with nature to remain healthy. Culturally, we need sites to gather in, open urban areas where the sky is possible, places to meet, wander, and contemplate. Urban sites and areas are human spaces that require human lighting.

Treating the lighting of outdoor sites and areas as we do the lighting of interior, lived-in spaces is the passion driving our area lighting offerings. To light sites and environments at the human level, for all of us who may find ourselves not just traveling from “A” to “B” but soaking in the journey or pausing to enjoy our surroundings. Our luminaires not only attract people while providing them with a safely lit area, they also help to protect the night sky and surroundings from unwanted light. We’ve thought a lot about what makes an outdoor area memorable and unique, and we’ve thought a lot about our environment. Our outdoor luminaires are at the cross-section of these thoughts. Our luminaires are designed and built to enrich your experience wherever you may find yourself. In this book of possibilities, we hope you, too, are inspired by light.

**MAKE  
LIGHT**

**WE  
THINK  
LIGHT**

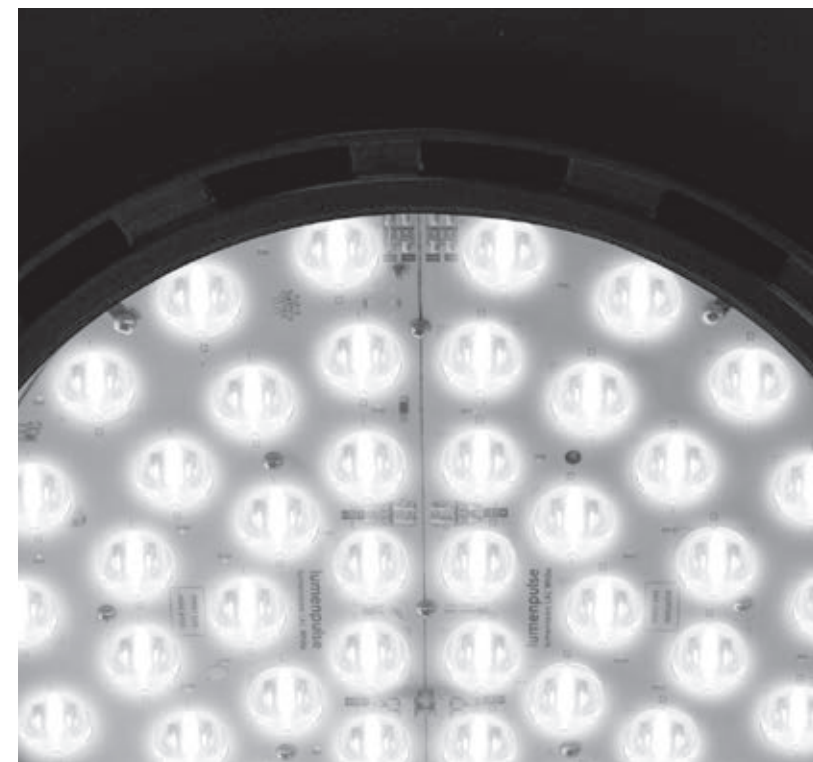

# Lumencentro

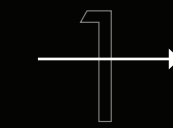

Living light that lands precisely where you wish, need, and want it to is the Lumenpulse way.

Lumencentro technology possesses a natural geometric synchronicity that embodies modern performance. This modular light engine is at the epicenter of a number of Lumenpulse linear and circular site and environment luminaires. It allows our fixtures to match their environment's requirements, be it seen or unseen, while intelligently supplying light right where you designed it to be.

**Output. Options. Optics.  
Outdoors. They all begin  
with Lumencentro.  
Precision distributions.  
Brilliant efficacy.**

To look further into the night, look for "Powered by Lumencentro" when choosing your site and area luminaires.

**In Fine Form**

Regardless of linear or circular shapes, our well-rounded LED boards are born to fit into the sleek form of each luminaire.

**Phenomenal Performance**

Lumencentro is lighting the way with outputs of 4000lm to 20000lm, precise distributions, and brilliant efficiencies.

**Natural Integration**

Blend with or enhance any environment through color-rendering capabilities and a choice of outputs and color temperatures.

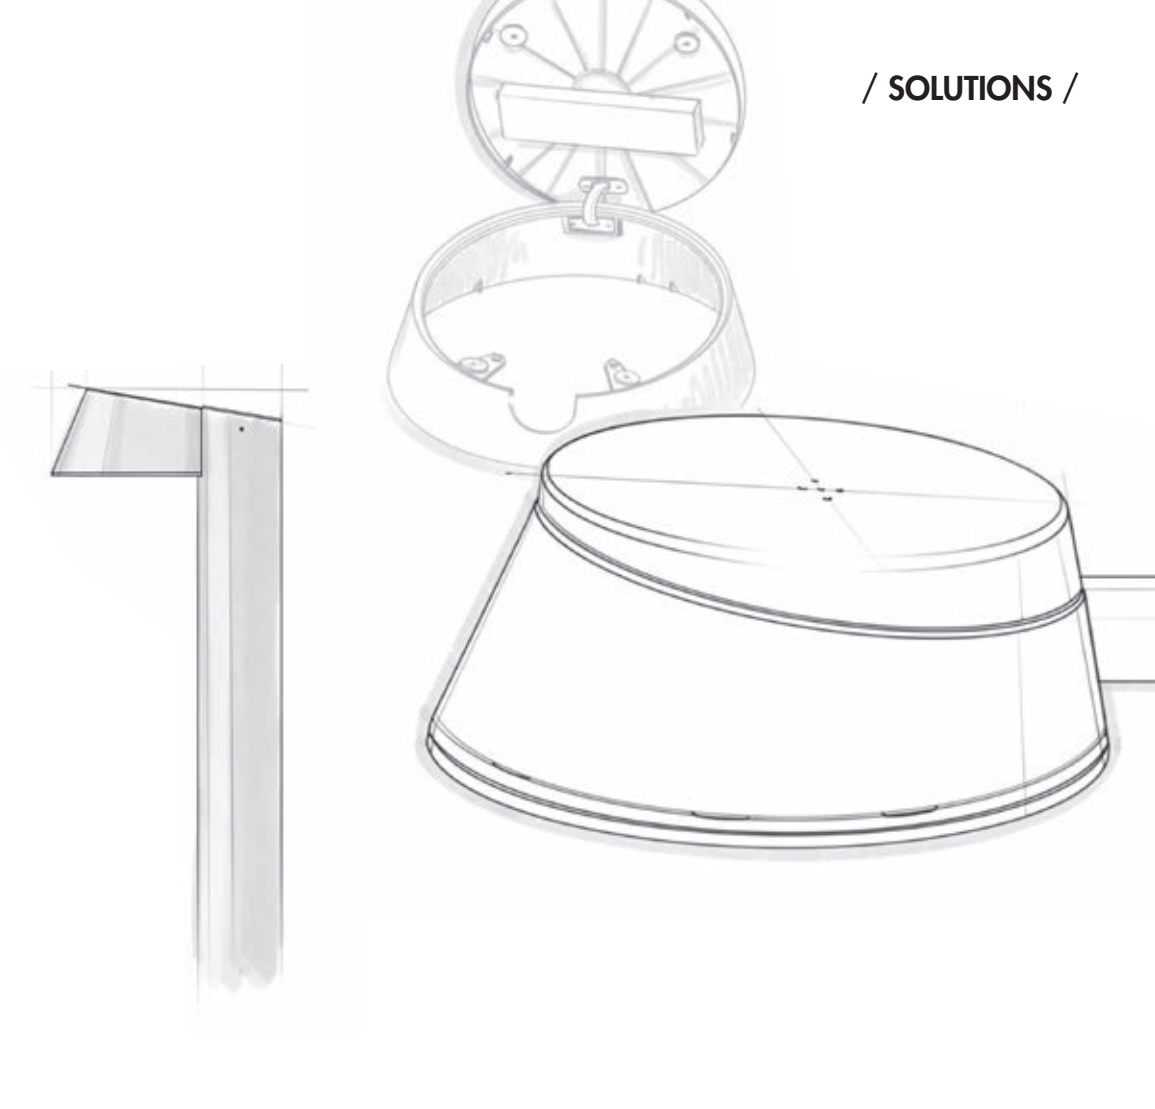

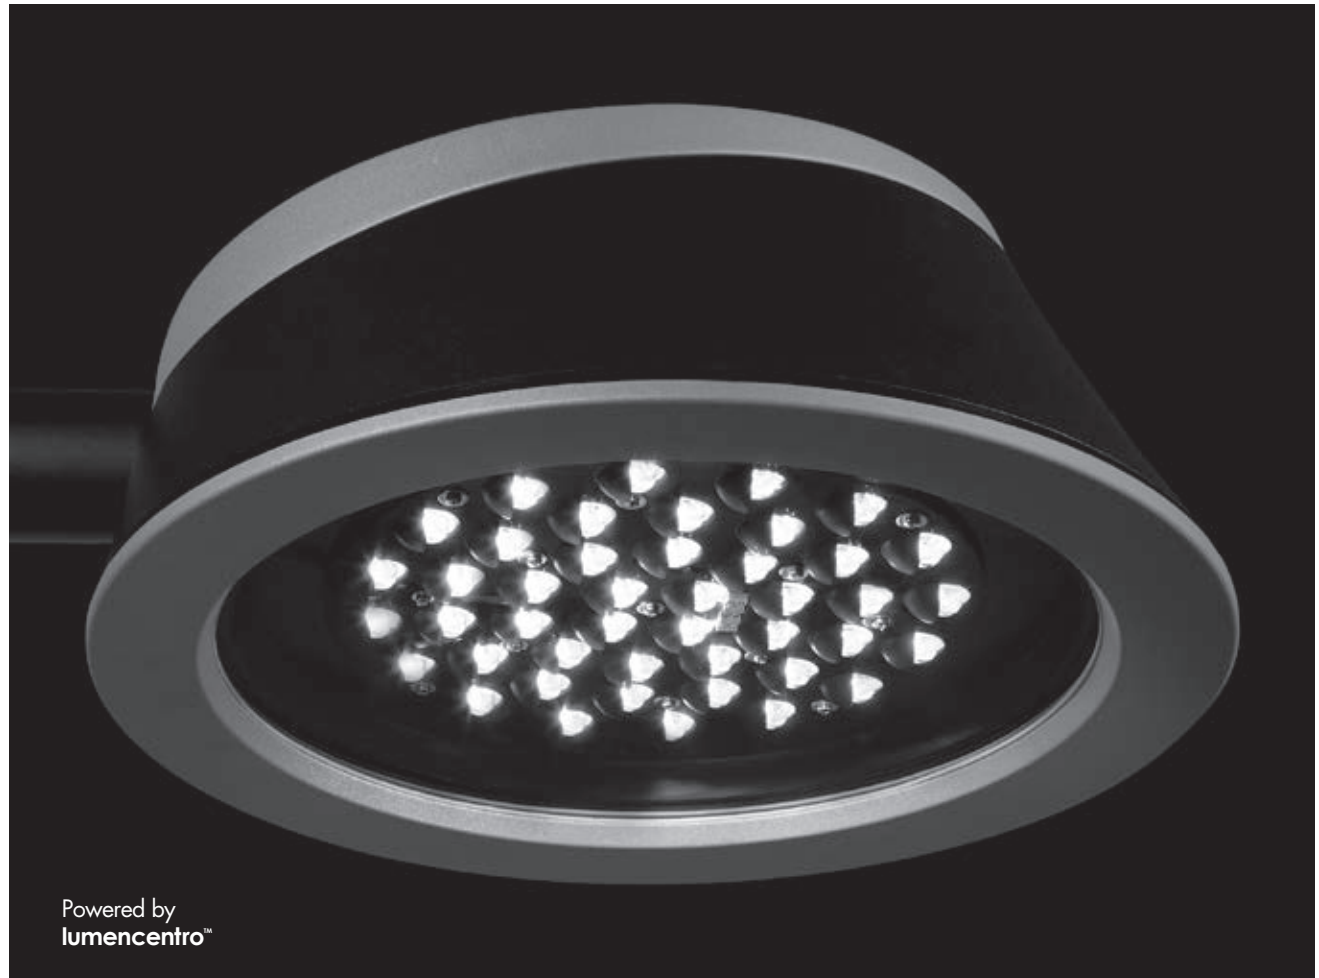

**Seeing Stars**

Our Lumencentro fixtures keep the stars bright and put light where you want it with an eye towards Dark Sky and LEED certification.

**Take the Heat Off**

The Lumencentro's thermal design draws out the heat allowing for higher lumen outputs and a better quality of light over a longer lifespan.

## Lumenicon

The Lumenicon family of luminaires symbolizes Lumenpulse's commitment to design flexibility and is iconic of all things Lumenpulse: They not only look terrific, they create fantastic light. Powered by Lumencentro, the Lumenicon family is designed with end-users in mind. Sleek, low-profile aesthetics hearken back to iconic styles while still looking to the future.

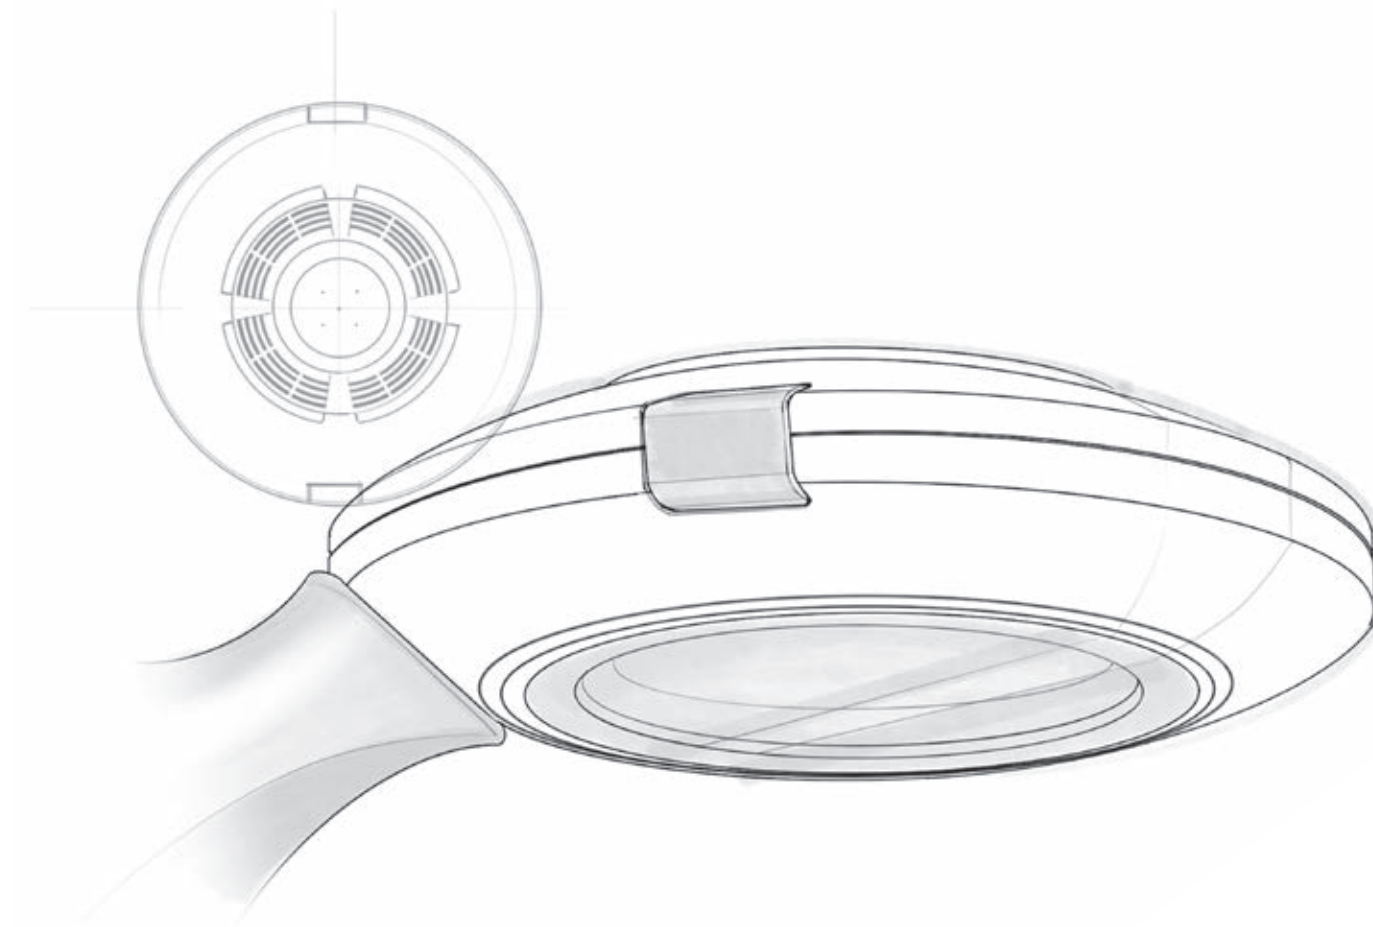

The Lumenicon will bring people to your space and help them feel safe while giving your projects a distinct signature with a coordinated look across numerous applications. Lumenicon luminaires make every area a landmark. Whether walking by the eye-pleasing Bollard, cycling past a row of Columns, or parking under an Area Medium, Lumenicon is the way.

## Pure

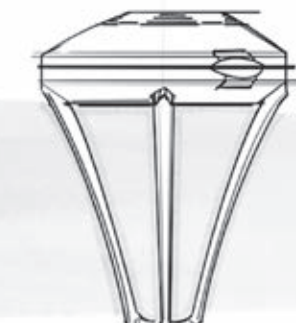

Simplicity is pure bliss. With a natural, geometric synchronicity that embodies modern performance, the Pure family has a plethora of options that let you build a luminaire to match your design dreams. The abundance of options gives you flexibility and adaptability while still allowing for complete design consistency when used alongside our other outdoor offerings.

Our definitive light engine, Lumencentro, is fully integrated into this low-profile, organically shaped fixture. The Pure is a pure-play solution for a range of urban lighting applications. It can be dressed up or kept minimalist, but regardless, the outcome is pure and simple: the Pure supplies a high quality of light to everything it illuminates.

## Steele

When you need a luminaire to steel itself against the weather while keeping a low EPA on a taller pole, this minimalist-design luminaire is your solid answer. A larger cousin of the Pure, the Steele offers uncompromising light and our highest lumen package. This powerhouse ensures that its full-coverage illumination makes for a safer space at night.

Reaching new heights while keeping a low profile is what the Steele does best, and we wouldn't want it any other way.

## Allegra

We don't believe you should have to compromise the soul for looks. The Allegra family is elegance personified. The futuristic interior technology, or soul, of the Allegra gives its classic appearance even more staying power. This stylish family of luminaires has the aesthetic options you need for any application where looks matter as much as what's on the inside. The Allegra has it all, sophisticated technology, options galore, and with one glance, you know an Allegra would easily be at home across any application.

# Lumenblade

The Lumenblade family gives every project an edge. With their naturally inspired crisp edges and clean lines, these luminaires blend with both minimalist architecture and the natural tableau of any outdoor landscape.

The Lumencentro light engine inside every Lumenblade creates a continuous line of light that is sustainable, provides a high level of security, and is sensitive to the natural environment. The shortest distance between two points is a line, and the Lumenblade family gets the light you need to the place you need it without any hindrance.

These luminaires weren't solely designed for people—with their motion-detector option, as well as thoughtful optical and output options—the Lumenblade family also provides a stellar quality of light that protects the starry sky while bringing the night to life.

Its seen-but-not-seen, minimalist design fits seamlessly with an environmental intelligence that cuts through the night when you need it to most.

## Element

Element is the type of luminaire family that is at home with every architectural movement to date. It blends with both the baroque and the brutalist, the art nouveau and new architectures yet to come. The Element family provides a choice of outputs and finishes, offering you the flexibility to be consistent with all of our luminaires across numerous applications. The Element family is also available in RGBW, Dynamic Warm, and Dynamic White so that you can create several effects and looks, including static solid colors, dynamic color chases, pulses, and even rainbow cascades.

# Mobilia Family Portrait

## Mobilia

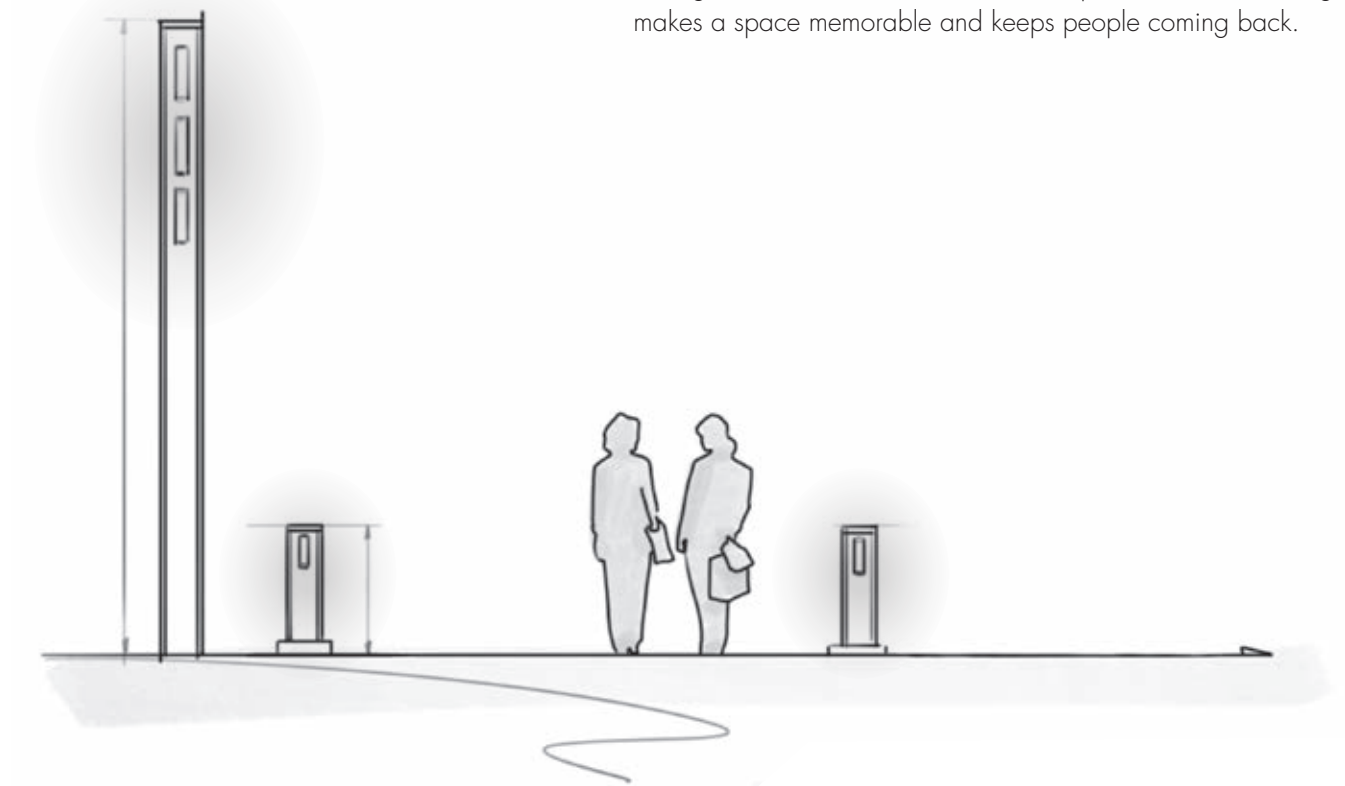

In every sense of the word, the Mobilia family is designed to move people. The family features a choice of round or square designs and diameters while also giving you the option of low or high wayfinding abilities. The Mobilia family helps you define movement through any outdoor space, providing an aesthetically exciting beacon with their clear or frosted lenses as well as numerous distributions that deliver even, eye-ensnaring illumination.

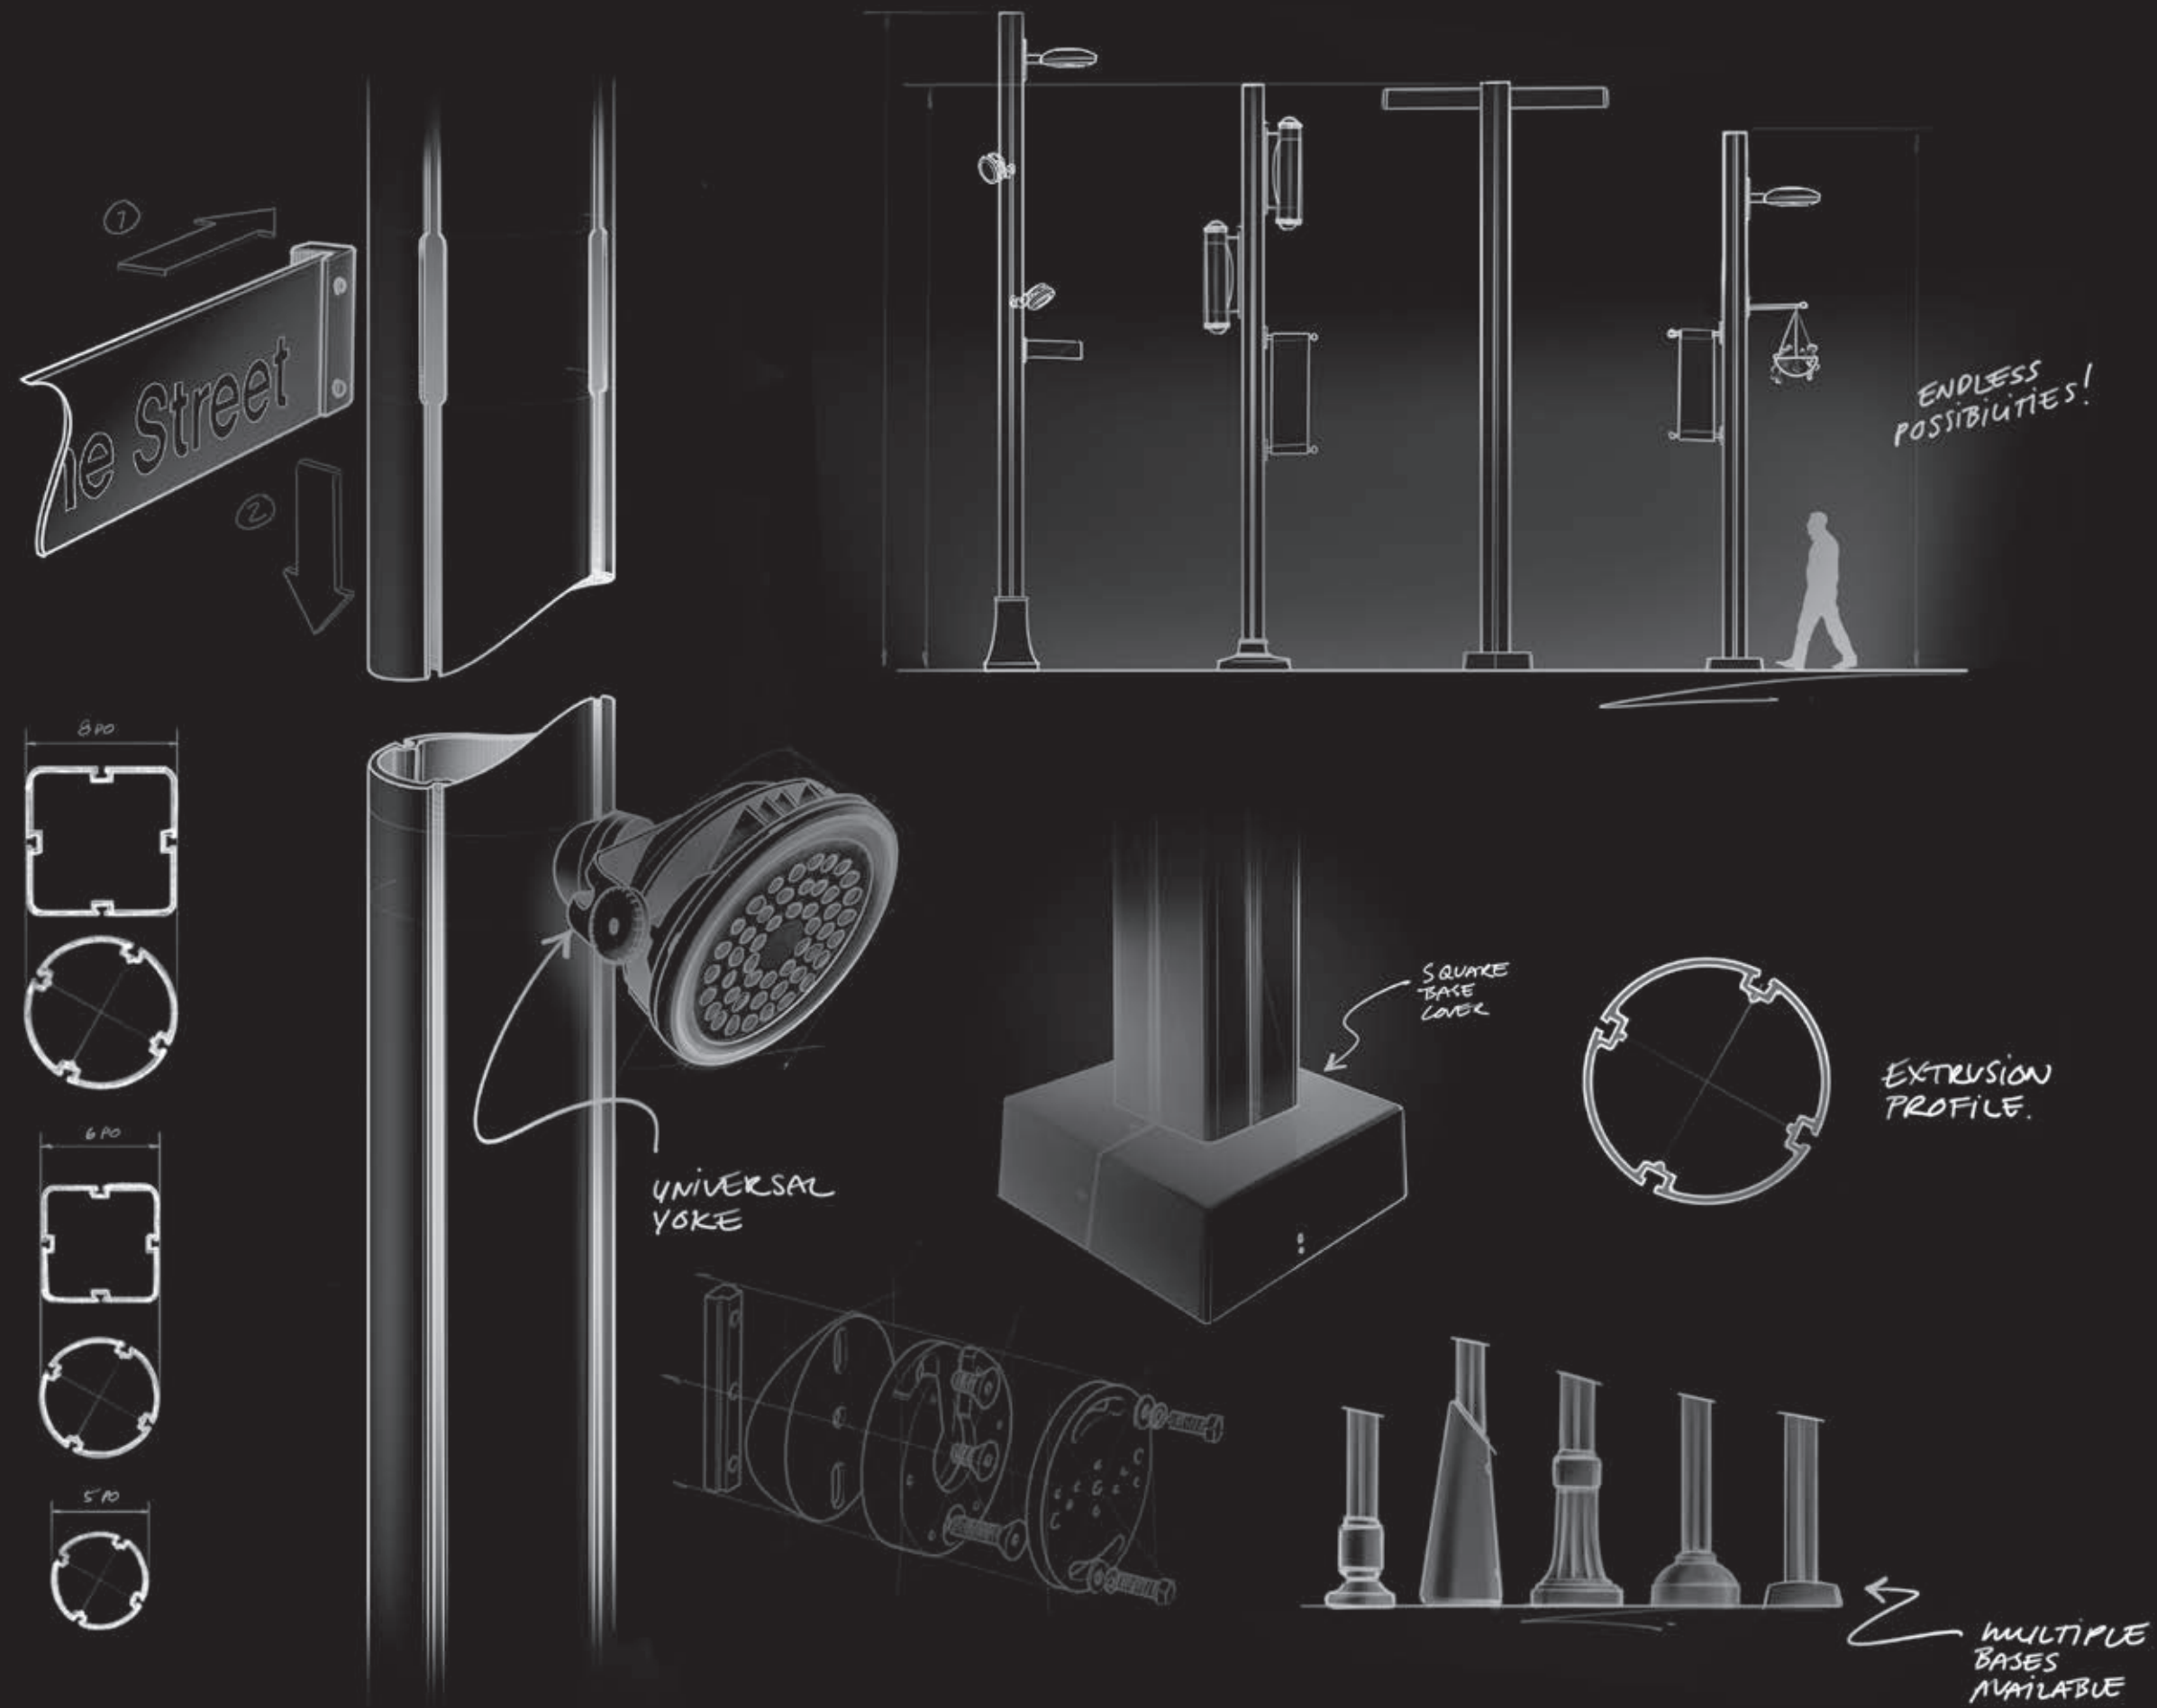

## Esplanade

The Esplanade family defines place. They are decorative yet decisive, casual and still attention-grabbing. This variable-height family of luminaires features a sleek design while providing unmatched versatility with a choice of single or double-sided modules. An Esplanade is the finishing touch that makes a space memorable and keeps people coming back.

## Lumentech

The Lumentech Smart Pole is designed to help supply outdoor spaces with security lighting, communication, sensing capabilities, and beautification, and it should come as no surprise, quality lighting. You can use accessories to create functional, informative, that safely welcome and help passersby.

The Lumentech Smart Pole fulfills your technological and urban needs and can be fully integrated with all of our outdoor products. The Lumentech Smart Pole is an instant contemporary classic and is available in various heights, finishes and is designed to be future-proof. The options are endless, as is our commitment to your lighting needs.

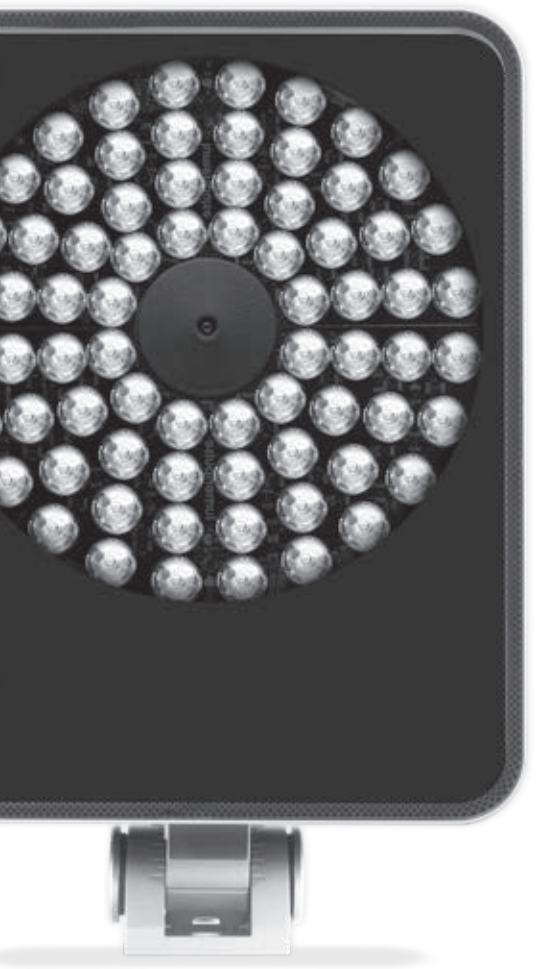

## Poles and Accessories

Lumenpulse Decorative Poles help your outdoor designs soar. Specialized for our outdoor products, our Decorative Poles are made of aluminum or steel and are available in multiple heights, diameters, options, and finishes. Our Decorative Poles also come in a choice of profiles (Square Fluted or Round) and are available in several thicknesses to suit the site and environment you have in mind.

We've made sure that our poles are the perfect match for the luminaires they hold. The pedestal should be worthy of the gem it carries.

# COMPLEMENTARY Products

## Lumenquad

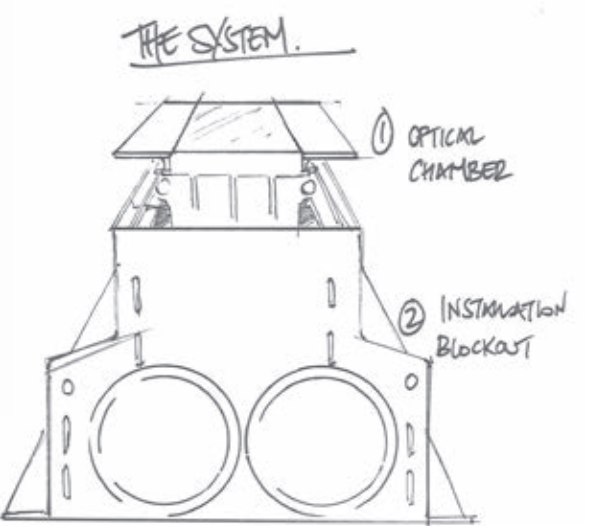

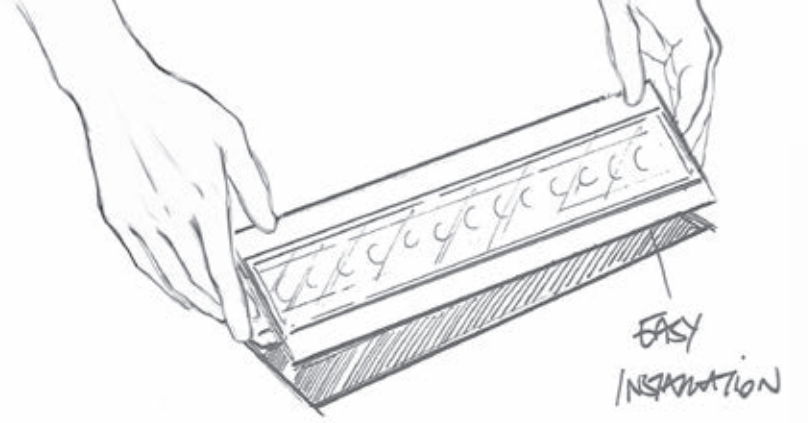

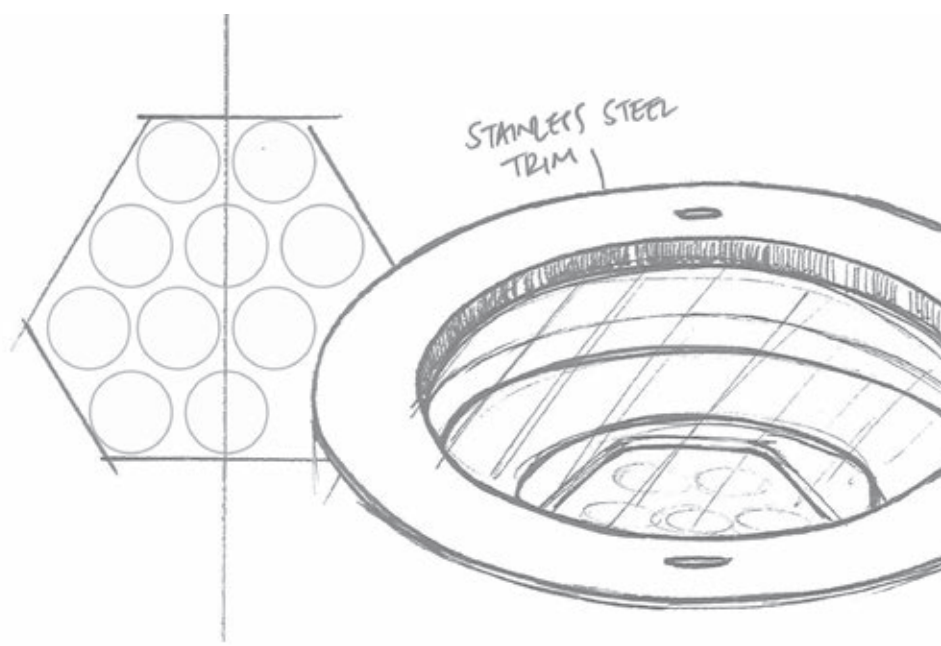

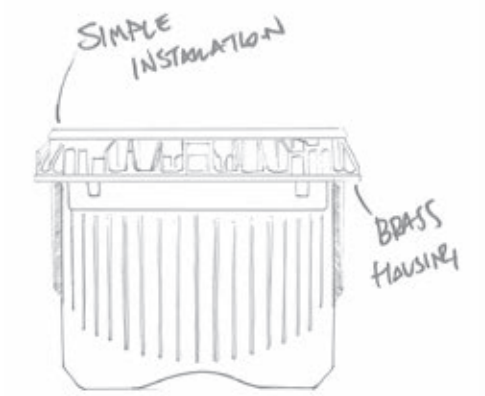

If only all math was this effortless. You've got a project where everyday versatility won't do. You need a luminaire that is elegant yet resilient—a luminaire that goes above and beyond. Well-rounded but squared, the Lumenquad is here to answer your design needs, to push both light and lighting further, and to inspire with its spectacular performance. There is nothing the Lumenquad can't do... Well, maybe it would make for a poor pocket calculator.

## Lumenbeam

When it comes to lighting landscapes, trees, columns, monuments, and architectural details, Lumenbeam is the answer. Countless options, outputs, optics, accessories, color temperatures, colors, and controls make it the workhorse of every outdoor space. We all need more companions like the Lumenbeam.

# COMPLEMENTARY Products

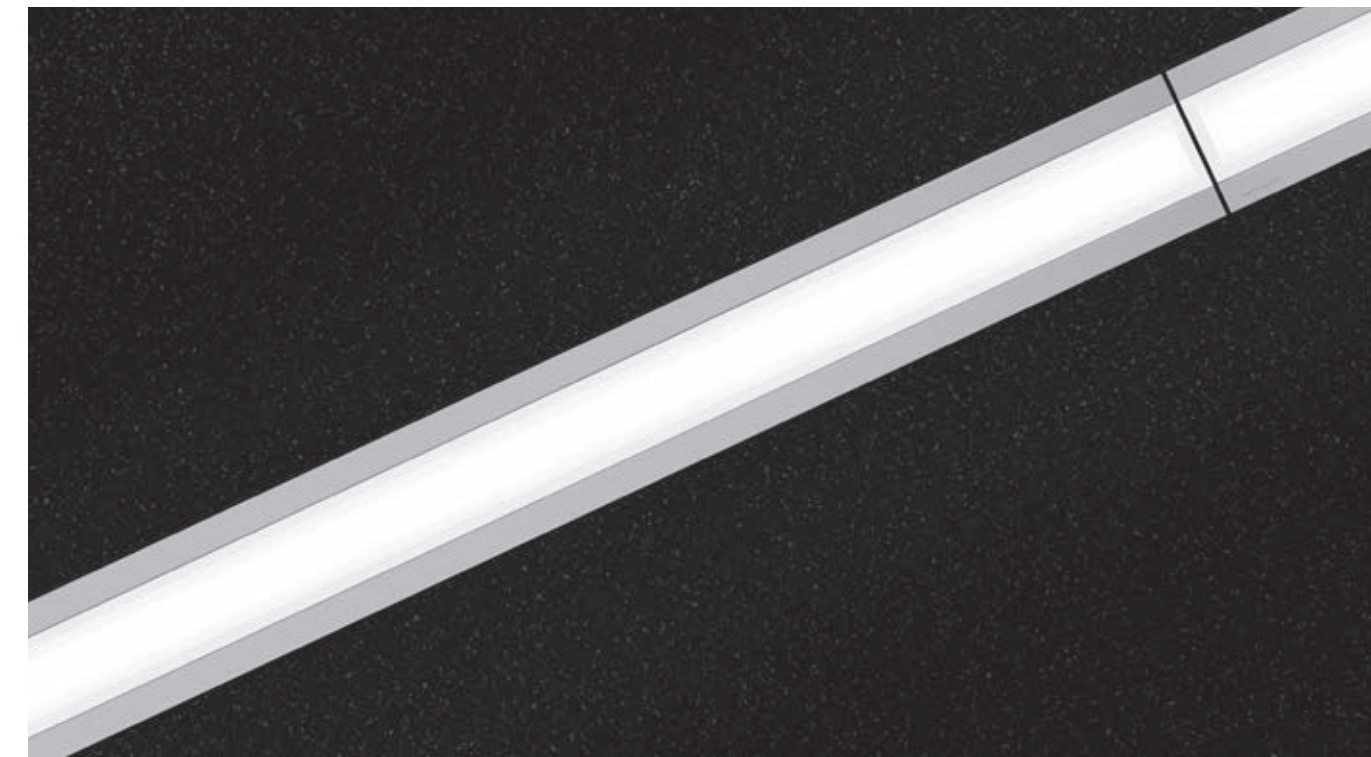

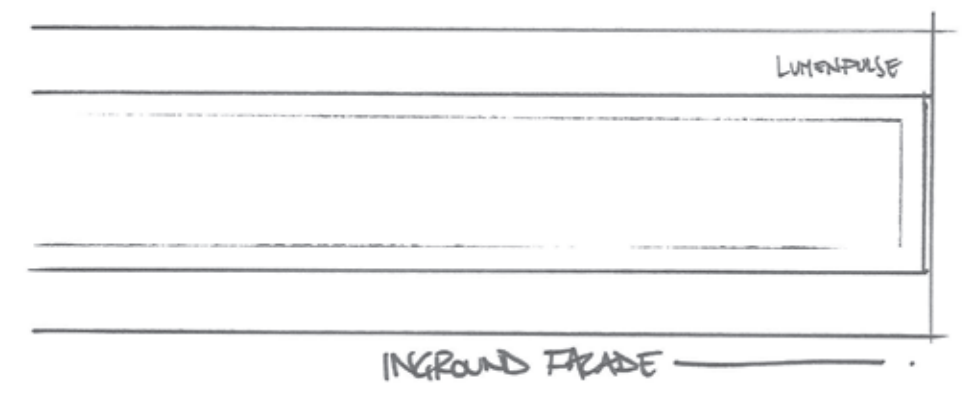

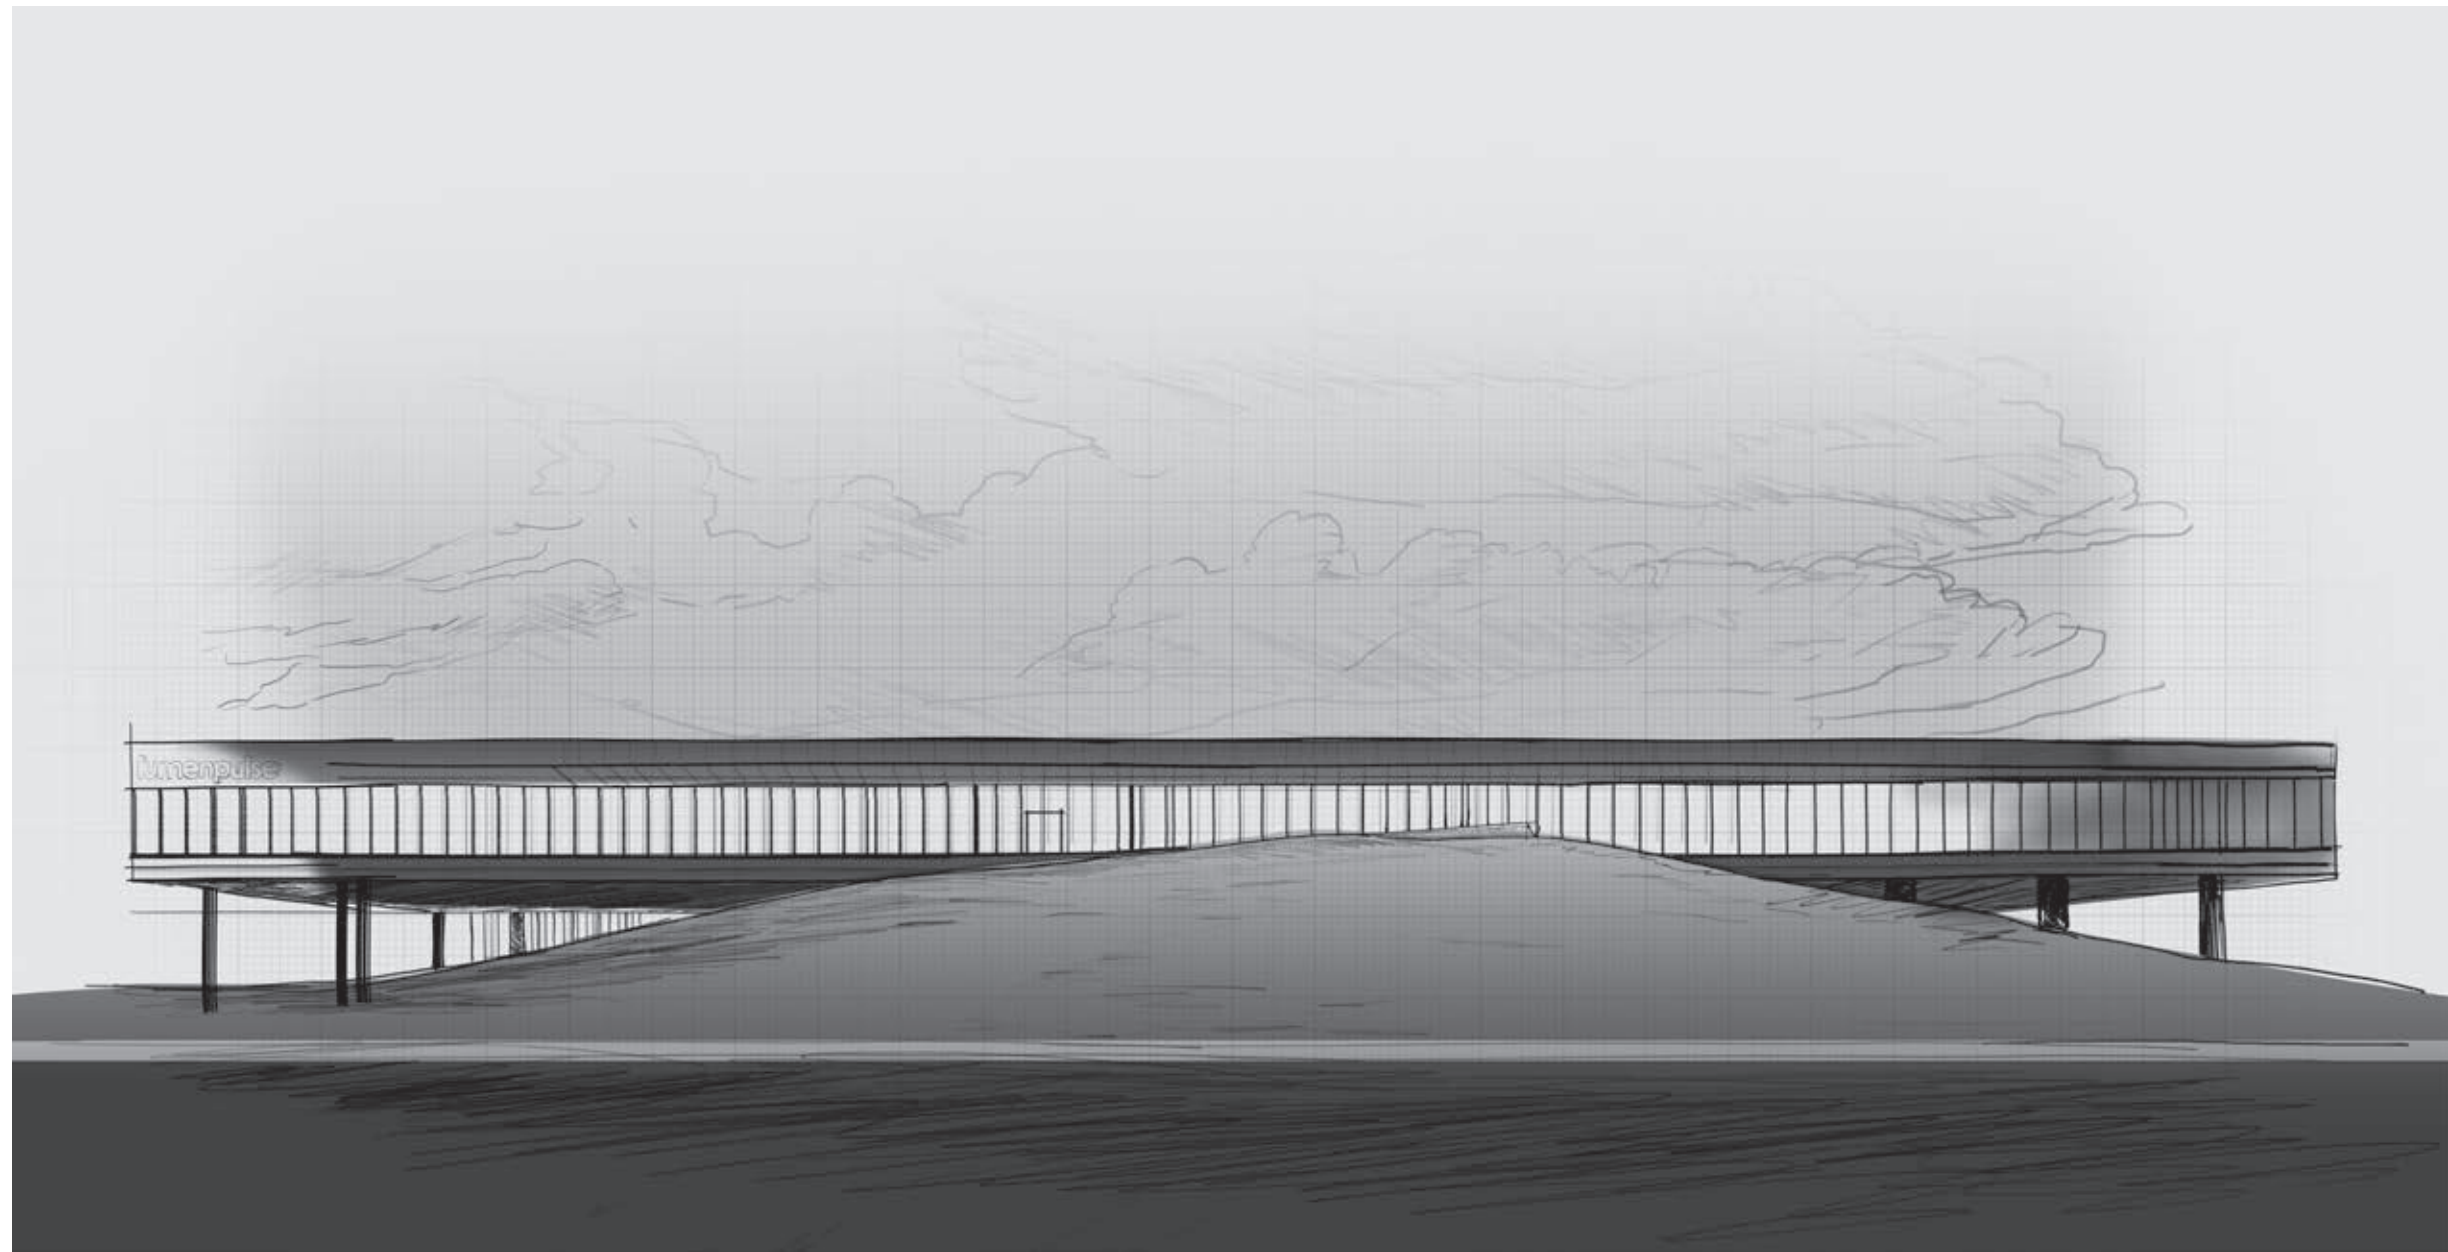

## Lumenfacade Inground

If you need a ground-recessed superstar that gives you a choice of asymmetric wallwashing, grazing, or linear wayfinding, the Lumenfacade Inground has you covered. An innovative, plug-and-play design simplifies installation, protects the system from water infiltration, and ensures long-lasting performance. The Lumenfacade Inground is capable of the reach and breadth required for most any project, and, as with every Lumenpulse product, it puts the light where you wish, want, and need it most.

## Lumenbeam Inground

This ground-recessed projector solves a range of lighting challenges through its choice of optics, trim, lenses, and control options. Like the Lumenfacade Inground, its plug-and-play design simplifies installation, protects the system from water infiltration, and ensures long-lasting performance. Built with robust, high-quality materials resistant to harsh environments, the Lumenbeam Inground might live in the ground, but it by no means has its head in a hole.
